

DANISH

OUTDOOR COLLECTION 2026

TGS | Outdoor | Private Label | Producer-direct

TGS is an outdoor furniture producer. We design and manufacture exclusively for retailers, wholesalers, and contract buyers, sourcing directly from Asia. No brand ambitions. No retail distractions. Just focused, reliable production of outdoor furniture under your label.

Our clients are professionals — buyers who value clarity, craftsmanship, and a direct line to the factory. Whether you are a retailer building a private label range or a contract buyer furnishing large-scale projects, TGS is the production partner your business needs.

DANISH
COLLECTION

DANISH LOUNGE CHAIR
DANISH SOFA 96"

LOUNGE

The Danish collection embodies timeless design and thoughtful craftsmanship. With subtle nods to vintage design and a modern sensibility, each piece showcases the natural beauty of teak through softly contoured forms and warm, organic details. From sunlit patios to garden retreats, the collection brings a sense of comfort and quiet elegance to every setting.

MOQ'S and lead times apply for all finishes. Please contact our sales team for details.

Material Icons

You may come across these icons within this catalog.

N **Natural**
The items marked with the **N** icon come without any finishing or protective treatment applied to the surface. A natural finish enhances the inherent beauty of the material but can require more maintenance.

V **Varnished**
The items marked with the **V** icon are finished with varnish.

B **Brushed**
The items marked with the **B** icon are brushed. This finishing gives our furniture more depth, the rougher surface highlights the grain of the wood.

Filling

Designed for outdoor performance, our outdoor cushions are built to withstand the elements and deliver fast-drying comfort.

PERFORMANCE FABRICS

Engineered for outdoor performance, our fabrics offer lasting durability, fade resistance, and a soft, comfortable feel.

Quick Ship

These fabrics are part of our Quick Ship Program and are kept in stock for faster production and delivery.

Our sustainability commitment

We believe that durability and sustainability start with choosing the right quality material, and wooden products are particularly suited for refurbishment.

As a vertically integrated company, we know we are in a unique position to contribute to a sustainable shift in the industry. From design to the sourcing of raw materials, packaging and testing, we pay great attention to environmental protection and consumer safety throughout the product-development process. As a company, we work to minimise waste and close the loop toward circularity. Together with our partners, we strive to do our humble share. Just as society and the industry evolve, so do we. We know there is no finish line in this journey and continue our efforts to constantly improve our products and operations.

DURABILITY BY DESIGN

We pay particular attention to the quality of our products, not only during the development stage, but throughout the entire life cycle. We believe that durability and sustainability start with choosing the right quality material, and wooden products are particularly suited for refurbishment.

THE ORIGIN OF OUR WOOD

The ultimate noble and renewable material, all our wood is sourced from responsibly and carefully managed forests compliant with the EU Timber Regulations and the Forest Law Enforcement, Governance and Trade (FLEGT) Action Plan. In addition, our wood sourced from Indonesia is verified under the Indonesian Timber Legality Assurance System (SVLK).

FOCUS ON QUALITY

Producing furniture and accessories at the highest quality, strength and safety is extremely important to us. Our internal protocols are based on the standards set by ANSI (American National Standards Institute) and BIFMA (North American Business and Institutional Furniture Manufacturers Association). Products also meet specific requirements based around ecological and health regulations such as toxic substance use and flammability.

WASTE REDUCTION AND CIRCULARITY

We want to remain as environmentally friendly as possible, working to reduce waste from the earliest design stage. With this principle, we design to reduce or reuse as much scrap wood as possible. Production waste such as leftover logs, wood and sawdust are reused for other purposes. With full control over the (re)design, production and distribution, refurbishing and recycling processes, we are developing a vision for sustainability based on designing for circularity and lengthening product lifespans.
